

Research Project Title: Florida Medicaid Alzheimer's Home and Community-Based Waiver Program: An Evaluation

Purpose of Project: The purpose of the project is to determine whether the Home and Community-Based Waiver program is successful in providing quality services to individuals with Alzheimer's Disease in a cost effective and budget neutral manner, and in meeting its stated goal of allowing beneficiaries to remain at home longer than they would without the waiver program services.

Project Duration: 11/1/04 through 11/30/06

Participating Personnel

Principal Investigator: David Chiriboga

PSRDC Policy Analysts: Margaret Kane, Diane Haynes

Contact Person: Margaret Kane

PSRDC Services provided for this project:

Data: Medicaid, IDS, CARES, CIRTS

Analyses: Create files from various data sets that include subjects that meet study criteria, descriptive statistics for demographic, service utilization and other related variables, tests of significance, ANVOA, regression analyses
